**Client's demographic**, background, including gender, date of birth, ethno-cultural background, immigration status and related information, as well as clients' employment and education;

Assessment information, as gathered through the assessment which combines elements from several wellknown assessment tools such as the Spousal Assault Risk Assessment (SARA), Brief Spousal Assault for the Evaluation of Risk (B-Safer) and Family Violence Investigation Report (FVIR);

**Service provision information**, including types of services provided, referrals made, as well as length, frequency and efficiency of intervention, also gathered in Frontline.

#### **USING DATA TO IMPROVE RESULTS**

How can HomeFront improve its cultural capacity to better engage racialized victims of violence? RELATIONSHIPS

Does this signal that victims are not receiving intervention sooner?

290

Can we improve victim engagement through text message?

44%

The number of clients who are racialized people. 18% identify as Indigenous.

How can we improve our risk assessment tools to ensure the risk of racialized populations is visible? 2020 number of crisis interventions – Compared to 29 Cl in 2019.

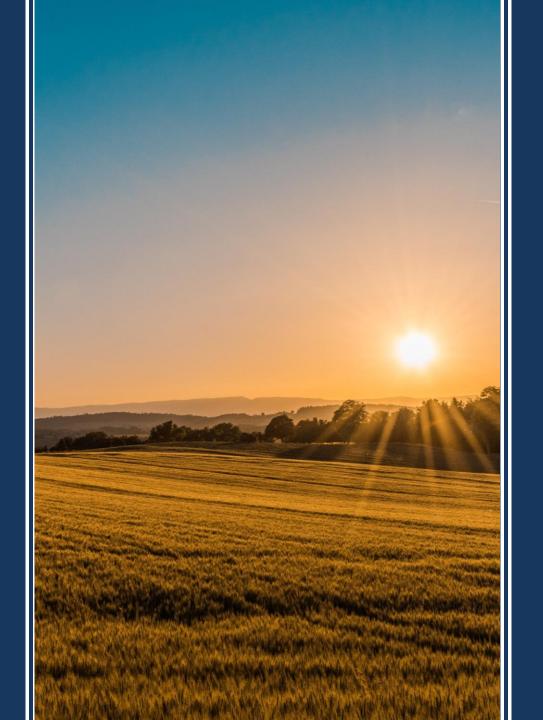

**RISK ASSESMENT** 

Does the increase in crisis intervention signal an increase of severity of violence? 2020 increase in use of text messaging to clients

430%

Is text message a safer alternative to communicate with clients when they are co-isolated with perpetrator?

## Scalable

## Principles

Eliminate Siloed Solutions.

#### **ELIMINATE SILOED SOLUTIONS**

- Define a common goal
- > Get the right people around the table
- Identify opportunities and limitations

#### Build Relationships.

#### **BUILD RELATIONSHIPS**

- Leverage community
- Add value to your partners
- Focus on early engagement

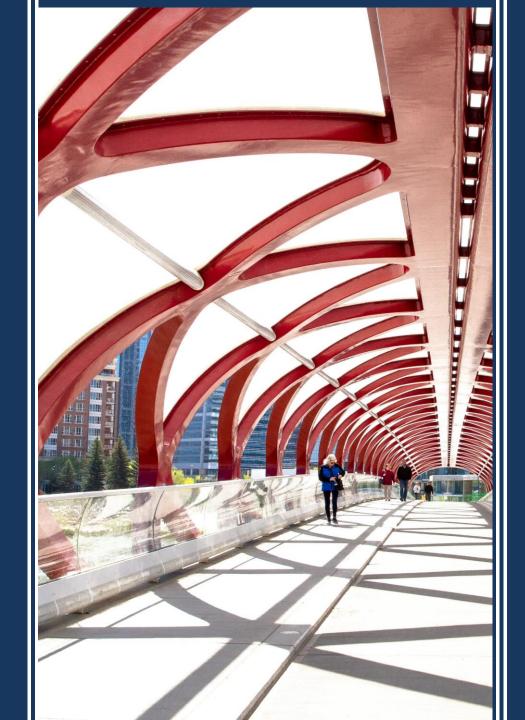

Continual Improvement.

#### CONTINUAL IMPROVEMENT.

- Monitor victim and offender outcomes
- Adapt coordination of services to improve victim engagement and offender accountability
- Enhance community capacity to address domestic violence
