## WORKSHOP 2

MONDAY, MAY 9, 8:00AM - 4:00PM

### INTRODUCTION TO SAFEGROWTH® AND LIVABILITY ACADEMY

**ANNA BRASSARD**, Urban Planning and Community Facilitation Specialist

Participants will receive an introduction to SafeGrowth® and Livability Academy through hands on exercises, discussion of data collection methods, and case studies. SafeGrowth is a philosophy built on the belief that healthy and functioning small neighborhoods provide the most healthy, and safest way to build cities in the 21st Century, based on the premise that crime is best tackled within small neighborhoods by harnessing the creative energy of neighborhood groups. Unlike programs like CPTED, which are typically run by crime prevention practitioners or the police, SafeGrowth methods seeks to embed skills like CPTED within the community by working directly with neighborhood associations, groups, and local change agents. The approach ensures higher levels of neighborhood social cohesion which in turn helps sustain community-building and crime prevention strategies in the long-term. The goal of Livability Academy is to ensure the sustainability and ongoing pool of neighborhood leaders, sometimes called Community Livability Academies, through a curriculum of presentations and workshops. Topics range from civic affairs, community leadership training, community organizing, project management, CPTED and SafeGrowth methodology, among others.

ADDITIONAL WORKSHOPS CAN BE FOUND AT [www.albertacrimeprevention.com](http://www.albertacrimeprevention.com)
